

Water Purifiers

EC105 - Standard Domestic Water Purifier

The EC105 is an affordable 5 stage reverse osmosis water purification system without a booster pump.

Standard features

- American manufactured 290 litres per day TFC membrane with pore sizes 0,0001 micron.
- National Sanitation Foundation (NSF) certified water storage tank.
- Federal Drug Administration (FDA) approved polypropylene double O-ring housings.
- All installation fittings included.
- Mechanical shut-off valve.

EC105P – Standard Domestic Water Purifier

The EC105P is an inexpensive 5 stage reverse osmosis water purification system with a booster pump for use in areas where the inlet water pressure is less than 3,5 bar (50 psi).

Standard features

- American manufactured 290 litres per day TFC membrane with pore sizes 0,0001 micron.
- National Sanitation Foundation (NSF) certified water storage tank.
- Federal Drug Administration (FDA) approved polypropylene double O-ring housings.
- 24 V Booster Pump with 220V, 50/60Hz transformer.
- All installation fittings included.
- Mechanical shut-off valve.

RO105 - Premium Domestic Water Purifier

The RO105 is an premium 5 stage reverse osmosis water purification system without a booster pump.
Standard features

- American manufactured 290 litres per day TFC membrane with pore sizes 0,0001 micron.
- National Sanitation Foundation (NSF) certified water storage tank.
- Federal Drug Administration (FDA) approved polypropylene double O-ring housings.
- Rust-free aluminium back plate.
- Stainless steel screws.
- All installation fittings included.
- Mechanical shut-off valve.

RO101SV – STANDARD Domestic Water Purifier

The RO101SV is an premium 5 stage reverse osmosis water purification system with a booster pump for use in areas where the inlet water pressure is less than 3,5 bar (51 psi).

Standard features

- American manufactured 290 litres per day TFC membrane with pore sizes 0,0001 micron.
- National Sanitation Foundation (NSF) certified water storage tank.
- Federal Drug Administration (FDA) approved polypropylene double O-ring housings.
- 24 V Booster Pump with 220V, 50/60Hz transformer.
- Rust-free aluminium back plate.
- Stainless steel screws.
- All installation fittings included
- Electrical shut-off valve.

RO103TDS - Computerized Domestic Water Purifier

The RO103TDS is the top of the range domestic water purifier in the world!

The RO103TDS is 5 stage reverse osmosis water purification system with a booster pump for use in areas where the inlet water pressure is less than 3,5 bar (51 psi). It is fitted with a LED display to continuously monitor water quality (TDS). The system flushes the membrane automatically or manually.

Standard features

- American manufactured 290 litres per day TFC membrane with pore sizes 0,0001 micron.
- National Sanitation Foundation (NSF) certified water storage tank.
- Federal Drug Administration (FDA) approved polypropylene double O-ring housings.
- 24 V Booster Pump with 220V, 50/60Hz transformer.
- **Convenient automatic and manual flush options to extend the lifespan of the membrane.**
- LED display with 5 functional light indicators.
- Continuous TDS reading.
- Rust-free aluminium back plate.
- Stainless steel screws.
- All installation fittings included.
- Electrical shut-off valve.

RO380 - Direct Flow Semi-Industrial/Domestic Water Purifier

The RO380 is a high capacity, low cost system. It is designed for light commercial and residential applications and is suitable for offices, schools, restaurants, guest houses, hotels, food processing industries, and shopping centres.

The Super 380 provides high quality drinking water with a capacity up to 1,0 litres per minute. The system is designed for direct flow and can be installed without a pressurized tank. It is equipped with a High Flow Booster Pump for increased water production capacity.

Standard features

- Two American manufactured 720 litres per day (total of 1440 litres) TFC membrane with pore sizes 0,0001 micron.
- Federal Drug Administration (FDA) approved polypropylene double O-ring housings.
- 36 V Booster Pump with 220V, 50/60Hz transformer.
- Frame stand for easy installation.
- Stainless steel screws.
- All installation fittings included.
- Electrical shut-off valve.

Road Runner - Outdoor Mobile Water Purifier

Ideal for Outdoor and 4X4 Enthusiasts:

- Pure water anywhere and anytime while on tour! Safe for babies to drink.
- Pure drinking water as the end result.
- Collect water in a container direct from a dam or river while fishing or hunting and purify it.
- When traveling or touring purify water from any source.
- Purifier can be connected to electrical socket (220V) or cigarette lighter in a vehicle (12V).
- The Roadrunner can also conveniently be installed at home to supply purified water for drinking, cooking and ice.
- The Roadrunner can deliver upto 240 litres of purified water per day.
- The Roadrunner is designed to give peace of mind for travelers and home owners and guarantees water free of viruses, bacteria, parasites and endocrine disruptive chemicals.
